

Ms. Myka

3rd & 4th math

About Me

My name is Myka Cochran and I have the pleasure of teaching your child math this year! I was born and raised in Chester, PA but I currently live in West Philly. I attended Temple University where I received a B.S. in Early Childhood Education. To some, I may have a familiar face. During my final year of college, I had the honor of student teaching at OEC under Ms. O and Ms. Honor! Their guidance and the amazing connection I made with students confirmed that education was the profession for me.

Why teach?

I always loved school. I loved learning, I loved reading, and I really loved math! I was blessed to have amazing teachers that were patient and took their time explaining tricky concepts. Their kindness inspired me, and I want your children to feel the same way I did. I understand children learn differently, and I am dedicated to finding ways to support our children and all of their needs.
